TEAM MANAGEMENT

Tinker with your starting lineup, shake up your team, and find the winning formula. You can change players from any of the squads from around the world.

CREATION CENTRAL

Build a player from scratch—or edit players you've already created—and choose everything from his name and skin tone to his stats. You can have up to 16 created players in the game.

EDIT PLAYER

Edit any player from any country and access all of his personal attributes. Change players to suit your imagination or to match their real-life counterparts.

SQUAD MANAGEMENT

Choose which country's lineup you'd like to change, then determine which players among the starters and reserves should switch positions. Press the ○ button to view the Player Bio and make sure you have them where they can do the most damage.

PLAYER STATUS BAR

FITNESS LEVEL/PLAYING STYLE

During a match, a Player Status Bar appears at the bottom of the screen displaying the highlighted player's current level of fitness and playing style.

FITNESS

The fitness level decreases the more a player sprints, slowing him down, but replenishes when he returns to normal pace.

POWER, WEIGHT, AND DIRECTION

- When shooting or lobbing, a Power Meter appears at the bottom of the screen. Keep the kick or pass button pressed to increase power (elevation and distance) and release when the meter has filled sufficiently.

PASSING

- Through balls, passes, lobs, and crosses are automatically directed towards a teammate or a teammate's run (in the direction of the left analog stick).
- To play first-time balls (passing or shooting without first controlling the ball), press the pass or shoot button before the ball reaches your player.

DRIBBLING

- The faster you travel, the trickier it is to trap an incoming pass or keep control of the ball. Try to balance your pace with the need for control.
- Place your player between the ball and an opposing player to shield the ball and maintain possession.

SECONDARY DEFENDER

For the defender nearest the ball, tackling isn't always the best form of defense. When facing the man in possession, it's sometimes more effective to block his route to goal and then call in a secondary defender (L1 button) to make the challenge.

TACTICS AND MENTALITY

Press the D-button to make tactical adjustments to your team's attack during the game and the L1 button + D-button to change your defense.
